

Join us for a seminar on:

Cancer and inflammation - advanced genetic tools uncover new insights in liver cancer and inflammatory enteritis

Venue: Nikolaus-Fiebiger-Zentrum
Glückstr. 6, Seminarraum im EG, Nr. 00.024

Date & Time: 20th Sep 2018
14:00-15:30 pm

14:00 - 14:20

Beyond mutations in cancer: Function of microRNAs and novel microRNA-target genes in liver cancer

by AG Dr. Peter Dietrich, Biochemistry and Molecular Medicine

14:20 - 14:40

In vivo application of a siPOOL targeting PU.1 with experimental chronic inflammatory enteritis

by AG PD Dr. Benno Weigman, Transcription factors in chronic intestinal inflammation or carcinogenesis

14:40 - 15:00

Specificity and Robustness from Diversity: Complex siRNA Pools in Target Discovery and Validation

by Dr. Michael Hannus, siTOOLS Biotech GmbH

15:00 - 15:30

Refreshments and discussion
